

New Zealand's Leading Provider of Professional Cleaning Equipment

WORLD OF CARPET CLEANING

The 7 Steps to Carpet Cleaning Success

1	2	3	4	5	6	7
Preclean	Treat Stains	Pre-Spray	Rinse	Agitate	Extract	Drying
Vacuum carpet to remove all loose debris and dust. Best done with vacuum with powerbrush.	Treat stains with appropriate chemicals according to instructions. Extract.	Using spray equipment, apply pre-spray. If deodorising, do so before pre-spray.	Rinse with hot water using hot water heater on your carpet machine.	With powerbrush, agitate to dislodge dirt from base of carpet fibers.	Chemical, water and dirt can be sucked up into the recovery tank.	Facilitate drying by creating strong airflow for water to evaporate.
